**Project:**

Replacement for heavy RVS Walkway

**Measurements:**

30 m x 2,4 m = 72 m<sup>2</sup>

**Location:**

The Netherlands (NL)

**Year:**

2020

**Product:**

Paneltim® Antislip - dots

**Material:**

PP

**Internal cells:**

50 mm x 50 mm

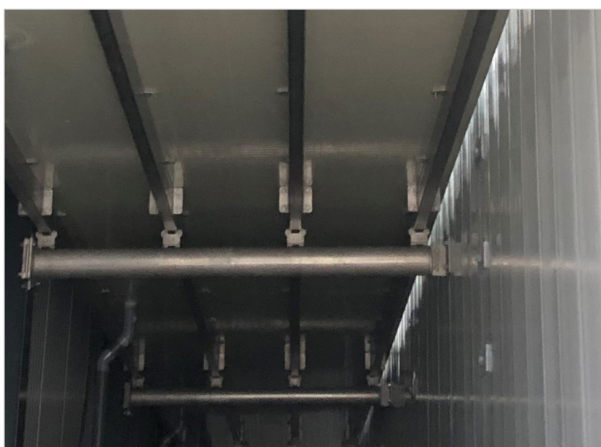

**Thickness:**

50 mm

For the replacement of heavy RVS walkways **Meizon**, a supplier of materials for infrastructural and industrial projects, choose to work with **Paneltim® Antislip panels** with a **dodded pattern**.

**Meizon** developed and installed the walkways. Prefab parts were crafted by **Pro-Therm**.

They chose PP Paneltim® panels because of their **lightweight** ( $\pm 12 \text{ kg/m}^2$ ), because they are **easy to clean** and have a **high slip resistance**.

To craft the walkways 2 panels were **welded** together to make a width of 2,4 m.

These panels were then carried by hand and put into place quickly and easily under slope on metal support beams.

Holes were also easily made in the panels to attach PVC pipes.

Paneltim | 20201019  
Paneltim is a manufacturer and distributor of PP and PE panels. Neither the processor nor Paneltim can be held responsible for the results of other projects. We would love to put you in touch with experts in this field.
